

TIME, DATE and TEMPERATURE MODULE

This unit is used in conjunction with all C.E. scrolling message centers from .3" to 3" height. The unit can be formatted to the most popular U.S. and European styles of displaying the date and time, and is also capable of displaying temperature in Fahrenheit or Centigrade. The time, date and temperature can be integrated into messages or displayed continuously on the screen. A battery backup will maintain the time settings during power failures. This unit is part of an integral system which requires the Mprog and from 1 to 64 scrolling message centers. This unit can also be used in conjunction with the C.E. Elite series P.I.'s.

Features:

- Temperature in Celsius or Farenheit
- Date and time in U.S. or European formats
- 12 or 24 hour format
- Includes setup software Windows 95/NT compatible
