

Elite PI[®]

Elevator Displays

9.0" | 10.4" | 12" | 15"

The Elite PI stands out above all other elevator displays by being the most flexible position indicator available. It allows the representation of much more than just an elevator position. It's a multi-functional unit designed to display both custom graphics and text, such as advertisements, tenant or building information and text-based messages.

With your Elite PI, your building can have the most unique screen style displays on the market today.
