

HDINT

The HDINT, is a HD video encoder that converts HD signals from the customer's 3rd party source to Ethernet via an RJ45 connector for inputs into the C.E. ENET interface box. This allows C.E. to stream video content in an HD format at up to 4MB/sec.

Interfaces with:

- * 8 foot HD cable
- * 8 foot RJ45 ethernet cable
- * UL/CSA Listed
