

# Segmented

## Series LED Displays

Our Segmented Series of LED displays are an excellent choice for standalone position indicators. They are 2.2" characters available in either single or double digit configurations. They also utilize 16 segment displays to offer full alpha-numeric capabilities with or without arrows. If two position indicators are required within the same car, CE offers auxiliary units. This feature offers increased savings to installation. CE Segmented Series are built in modules so that they are flexible enough to allow custom configuration. The Segmented Series offers many of the special features that are provided on the Micro Comm 3 wire network.

\* Available in Red, Green & Blue.
